Global Overview:

United States:

The U.S. market closes with positive returns. The DOW JONES index closed in positive territory, even though the odds of a recession in the US next year now stand at 38%, according to the latest forecasts from Bloomberg Economics. Also, there is a renewed spike with the Covid cases in China and a worsening gas crisis in Europe are signs that a global slowdown is on the horizon despite these efforts. Similarly, according to a survey, 1/3 of Americans consider the economy to be in recession. The S&P500 index also ended with a positive performance, against a backdrop where U.S. stocks rose and Treasuries fell on an announcement of recent economic data showing slightly slower growth, leading some to consider Federal Reserve reiteration. Finally, the NASDAQ index ended with a favorable return, in a context where Fed officials have agreed that interest rates should continue to rise for longer, to prevent inflation that could even generate a slowdown in the economy. Thus, DOW JONES +0.23%; S&P 500 +0.36%; NASDAQ +0.35% ended the day with mostly positive results.

Europe:

Major European indices ended the session with positive returns. The pan-European STOXX 600 index closed higher after the Norwegian government ended the offshore workers' strike at the country's refineries through a compulsory wage arbitration it had initiated in order to demand higher wages due to rising expenses following inflation, thus reducing concerns of rising energy costs on the Nordic country's supply side. The FTSE 100 closed with returns in positive territory, as the pound recorded its worst decline against the dollar, boosting the export index's gains. The index was also boosted by dollar-denominated stocks such as AstraZeneca, Diageo, and Unilever. This depreciation of the British pound against the US currency was due to a crisis in Boris Johnson's government. In the German market, the DAX index closed positive after a technical rebound driven by the technology, financial services and retail sectors. This, in a context in which better than expected data was presented in terms of company orders; indicating a still strong German market. Finally, the French market also closed higher, affected mainly by the reduced concern associated with the resolution of the Norwegian strike that would have further affected the cost of energy in Europe. Thus, FTSE 100 +1.17%; CAC 40 +2.03%; DAX +1.56%; STOXX 600 +1.66% ended with positive performances.

Asia:

Major Asian indices closed with mostly negative returns due to new contagions in China and the plunge in oil prices. The Chinese market closed in negative territory due to multiple COVID-19 outbreaks in several parts of the country, including Shanghai. This has prompted massive testing and further restrictions. The Hang Seng index ended lower despite expectations of a possible increase in COVID-19 infections in China. Slumping oil prices, amid fears of a recession, dampened sentiment. The South Korean market fell this session as recession fears weighed on hopes of lower inflationary pressure. On the other hand, hopes of a recovery in demand in China are fading, leading to a sell-off in commodity prices. The Japanese market closed in negative territory, dragged down by energy stocks, on fears of a global economic slowdown. Oil exporters lost almost 10%, making them the worst performers of the session. The Australian market ended lower as a new round of COVID-19 tests in Shanghai, China's most populated city, raised concerns of further shutdowns in the country. Thus, NIKKEI -1.20%; HANG SENG -1.22%; CSI 300 -1.46%; S&P/ASX 200 -0.52%; KOSPI -2.13%; SHANGHAI COMPOSITE -1.43% ended with negative returns.
