Global Overview

United States:

The US stock market ended the day with negative results, after the publication of the minutes of the Federal Open Market Committee, which showed some concern that the increase in inflation could require a faster pace of interest rate hikes. In addition, the members of the Federal Reserve voted unanimously to increase the cost of loans by a quarter percentage point and expressed confidence that the economy would strengthen and that inflation would increase in the coming months. On the other hand, the price of oil rose more than 1%, reaching its highest level since 2014, as geopolitical concerns eclipsed the construction of crude inventories in the United States. In more detail, Saudi Arabia said it intercepted missiles on Riyadh and US President Donald Trump warned Russia about the imminent military action in Syria. In addition, Syria is not a major oil producer, but any sign of conflict in the region raises concerns about oil flows throughout the Middle East. The reports of missiles in Riyadh aggravated those concerns, in this way, the existing concerns of the United States could renew sanctions against Iran.

Europe:

The European market finished the day with downward results in its main indices. Although the tension is maintained by the US-China trade war, US military involvement in Syria and its threats to Russia to send missiles begin to take a bigger role in the market, and could hurt investors even more. The results were reflected in the poor performance of indicators such as the Euro Stoxx 50 which suffered a fall of 0.55% and the FTSE100 which fell by 0.13%. The announcement of Tesco, the grocery store with the highest market share in the United Kingdom, which will pay dividends after 4 years to achieve revenue in the year above the predictions, is considered as a company that amortized the fall of the indexes with its increase of 7.18%, leading to the FTSE100. On the other hand, the manufacturing production of the United Kingdom fell 0.2% in February after remaining constant in January, reflecting the slow economic start of the country in 2018. In other news, the group of investors DWS Group has requested information from the European giant of construction of aircraft, Airbus, additional information due to the investigations of possible illicit handling in the company, affecting the value of the shares that fell by 3.13%.

Asia:

The Asian market closed the session with mixed results among its main indices. Many of the Asian markets closed the session with positive results, as is the case of China with its SHCOMP index which rose +0.56% and the Hong Kong index (HSI) which rose +0.55%. These results came after the governor of the Chinese Central Bank said in a forum that the daily share exchange share of the system with the Hong Kong market will quadruple next month to 52 billion yuan. For his part, UOB executive Director Kay Hian, Steven Leung, said that he expects a break in the strengthening of Hong Kong due to geopolitical tensions. Also, in economic news, China published lower-than-expected inflation data for March after consumer prices reached 4-year highs in the month of February. For Ding Shuan, chief economist of Greater China and North Asia at Standard Chartered Bank, this would be the product of seasonal factors and would not persuade China to change its relatively tight monetary policy. Also, according to James Cheo, senior investment strategist at the Bank of Singapore, the issue of inflation is not a reason for investors to worry. On the other hand, markets like Japan closed with downward indices such as the Nikkei -0.49%, the Australian index XJO -0.48% or New Zealand which closed with its NZ50GR index at -0.19% as a result of the decline of the large Australian banks.
