Global Overview:

United States:

The US market closed the market again with negative results, after investors' fears intensified due to pressure from the European Union talks and a report from the International Monetary Fund showing a weak result with respect to the global economic growth. In detail, it is appreciated that the tensions of trade between the United States and the European Union are due to the office of the US Chamber of Commerce threatened to impose taxes on many European products. This act aims to be a retaliation against the subsidies granted to the aircraft manufacturing companies, Airbus SE (-1.86%). Meanwhile, the IMF forecasts a lower result for global growth, lowering the rate from 3.5% to 3.3%, marking its third reduction in growth expectations in just 6 months. In parallel, the data published yesterday showed that the US labor market is contracting even more, after a decrease of 538,000 jobs in new job offers during the month of February. Among individual stocks, Apple Inc. (-0.3%) closed down, ending its 9-day streak of growth, pausing its efforts to get the \$ 1 trillion stock market capitalization. In the case of General Electric Co. (-2.85%), its shares suffered a fall in price because J.P. Morgan analyst, Stephen Tusa, downgraded the stock.

Europe:

The European market closed down, with the DAX (-0.94%) having the highest losses in the region. President Donald Trump threatened to impose tariffs on European Union products worth \$11,000 billion after the World Trade Organization found that the EU subsidizes the Airbus company. Also, a day earlier, the US Trade Representative proposed imposing tariffs on a list of products, from commercial aircraft to dairy products and wines. On the side of the counterpart, the European Commission is beginning preparations for the EU to act quickly. In the United Kingdom, the FTSE 100 fell -0.35% after the IMF - International Monetary Fund - indicated that the UK will suffer economic damage equivalent to the loss of at least two or three years of normal growth from now until the end of 2021. Even, under a relatively uncensored Brexit scenario, the economy would grow 3.5% less by the end of 2021 compared to a milder Brexit. Italy cut its growth forecasts for this year (0.2%) and the next, while increasing the budget deficit and public debt. In other news, the chairman of the Financial Stability Board (FSB), Randal Quarles, mentioned that global financial regulators are developing a coordinated surveillance system to detect new threats based on lower loan standards and high asset values.

Asia:

The Asian market closed the day with mixed results among its main indices, after the gains of Wall Street and with the pending investors of the Brexit developments and corporate profits. In China, the blue-chip index CSI300 (+0.45%) rose, after Beijing will take measures to encourage urbanization in a new momentum to reactivate the deceleration of economic growth, however, the broader index of Shanghai (-0.16%) closed the session lower in the uncertainty about the trade negotiations with the United States and the next release of data. On the other hand, Japan seems to have dodged a recession thanks to resilient business spending, but the sectors of factories and exports, and the lack of political options, make it particularly vulnerable if a projected recovery in the global economy does not materialize. Against this, the Nikkei 225 (+0.19%) benchmark index, started the day trading in red, however, a rebound in technology stocks and machinery shares exceeded the negative performance. In corporate news, Sony jumped after Reuters reported that US hedge fund Third Point was increasing its stake in the company to push for changes.
