Global Overview:

United States:

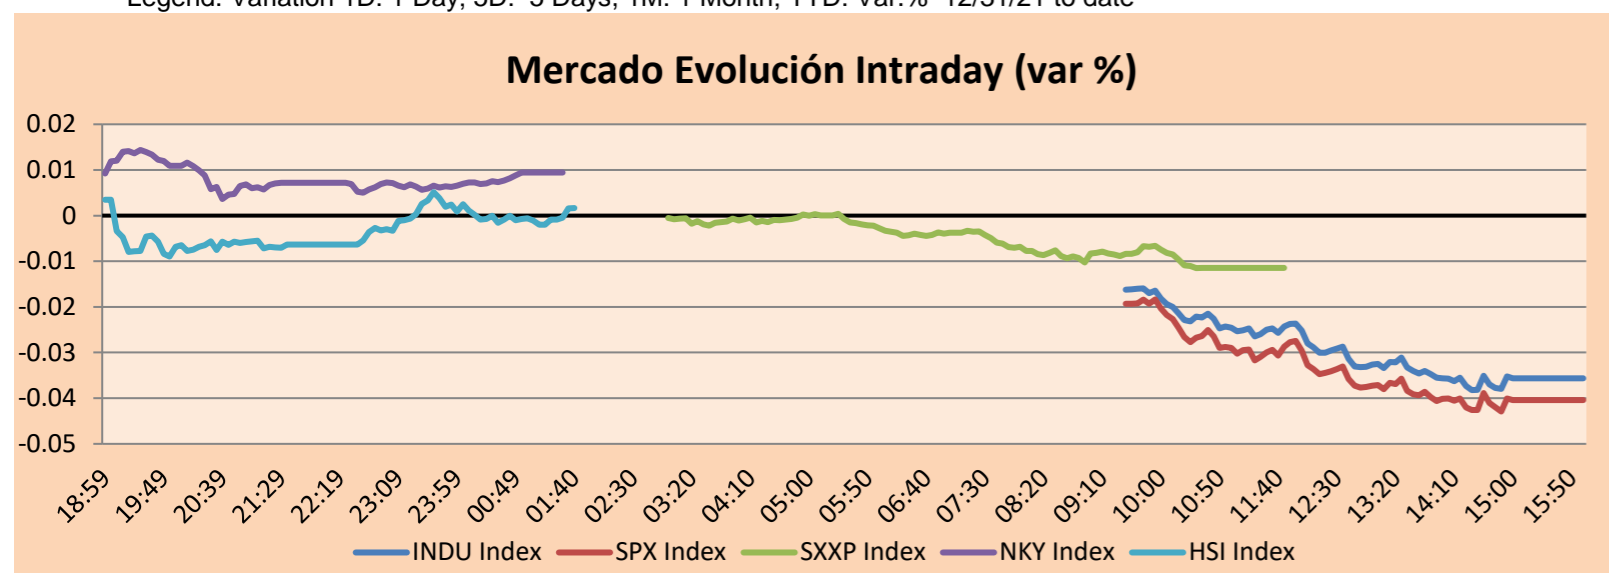

The U.S. market closed with negative returns, as the market assimilated the hawkish comments from Federal Reserve officials and data showing slower growth in the manufacturing sector. The DOW JONES index closed in negative territory, in a context where US manufacturing activity slowed less than expected in July. High inflation continues to be a complaint among companies, although the overall increase in input prices has started to slow considerably. The S&P500 index ended with a negative performance, with the Atlanta Fed's real-time GDP tracking indicating an increase of only 1.3%, versus Friday's reading of 2.1%. Goldman Sachs, meanwhile, downgraded its outlook estimate from 1% to 0.9%. Finally, the NASDAQ index closed with negative performance as, after hinting at a possible turnaround last week, Fed officials suggested that the central bank will have to raise rates further to control inflation. The ISM manufacturing purchasing managers' index was the latest data showing that the Fed's aggressive tightening is starting to dampen economic growth. Thus, DOW JONES -0.14%; S&P 500 -0.28%; NASDAQ -0.18% ended the day with negative results.

Europe:

The main European indices ended the session with negative performances, but almost flat. The pan-European STOXX 600 index closed lower due to the poor performance of energy stocks in a context in which investors were pessimistic due to fears of a global economic recession following the disappointing release of Chinese economic data and a contraction in manufacturing activity in Europe. In particular, the energy sector recorded declines of 1.5% as a result of lower crude oil prices due to the reactivation of fears on the demand side, following the release of European manufacturing results. The FTSE 100 closed in negative territory, following the dynamics of the STOXX 600 due to the pessimism of regional investors after the release of European manufacturing data and the UK PMI. However, solid corporate results from Europe's largest bank, HSBC, and Pearson Group offset the losses, allowing the market to close almost flat. Regarding the German market, the DAX index closed almost flat following the dynamics of the other European countries, but, mainly driven by the release of weak data from the German Retail sector due to rising inflationary pressures. Finally, the French market also fell, after the Euro zone's poor performance reflected in manufacturing activity. In particular, TotalEnergies and CGG fell by 1.5% each. Thus, FTSE 100 -0.13%; CAC 40 -0.18%; DAX -0.03%; STOXX 600 -0.19% ended with negative performances, but almost flat.

Asia:

The main Asian indices closed with positive returns. The Chinese market closed with slightly upward returns, driven by gains in automobile and new energy stocks, which rose between 1.5% and 2.2%. This was due to more optimistic expectations in the Chinese economy as a result of the Chinese government's decision to prioritize operations with more stability in the capital market. Likewise, to stimulate consumption, it imposed the extension of taxes on purchases of new energy vehicles. In line with mainland China, the HANG SENG index remained unchanged on Monday, in a context where Alibaba Group fell with -3.8%, this being one of the last companies facing risks of expulsion by the American market. On the Japanese market side, it had a positive performance, closing at its highest levels in almost two months. It was mainly driven by upbeat corporate results from major domestic companies, such as shipping giant Mitsui OSK jumping 3.9% and Japanese manufacturing companies. The South Korean market ended the session in slightly positive territory, against a backdrop of risk-averse expectations caused by mixed economic indicators in the country and globally. The Australian market rose on the back of last week's commodity rally, which boosted mining and local stocks. Thus, NIKKEI +0.75%; HANG SENG +0.05%; CSI 300 +0.45%; SHANGHAI COMP. +0.21%; S&P/ASX 200 +0.69%; KOSPI +0.03% ended with mixed performances.
